

Klaimer® electric

NEW

Up Or Down – At The Press Of A Button

Klaimer® electric helps you get up from the floor and also moves you gently down to the floor from a wheelchair, for example, without the need for an assistant. This opens up a world of new possibilities for activities and independent living, even when your physical abilities are limited or your mobility is impaired.

For Independent & Active Living

CE MD
CLASS I

Assistive Product

For Home & Healthcare

Klaimer® electric is a mains powered person lifting chair. The seat moves down – and also lifts up – steadily and safely by pressing a button on the handheld controller. Because Klaimer® electric also functions as a regular chair, it requires no extra space. It is a well-designed utility and at the same time a piece of furniture for any space or room.

- Easy and pleasant to use.
- Practically silent in operation.
- Plug & Play – no assembly or setup required.
- Award-winning design.

Lifts You Up

The seat rises to any height up to 55 cm, making it suitable for most users and situations.

Sets You Down

The seat moves down to just 5 cm for easy access to and from the floor.

Easy Operation

The UP / DOWN toggle switch is intuitive and safe to use.

Movable On Wheels

Klaimer® can be moved on its wheels, making it suitable even for large home & care environments.
