

Klaimber®

klaimber.com

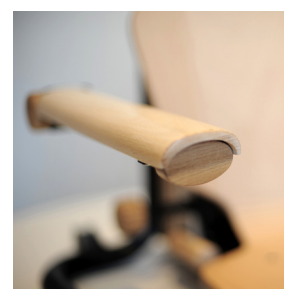

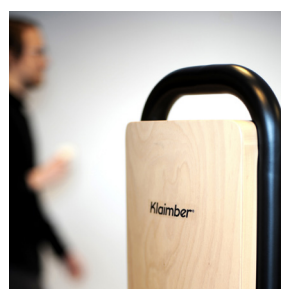

GET UP FROM THE FLOOR EASILY, QUICKLY AND SAFELY!

Klaimber is an assistive chair that functions as a person lifting device. It helps you get up from the floor when you need to, even if your physical abilities are limited or weakened. Getting up happens with easy sideways swinging, without assistance.

Patented Finnish innovation!

- ✓ Increases your independence, activity and managing daily life by yourself.
- ✓ Works without electricity and does not require a helper.
- ✓ Reduces outside contacts and can therefore reduce infection transmission risks.
- ✓ Furniture-like design fit for home.
- ✓ Also functions as a regular chair – Klaimber is an assistive device only when needed.

HOW KLAIMBER WORKS?

1

You are on the floor, unable to get up on your feet, or feeling weak. You move along the floor close to Klaimber.

2

You can lower the seat down to the floor, where it is easy and safe to slide yourself onto the seat.

3

The seat lifts up with a gentle sideways swinging motion of your body. You can use the armrests for support and stability if needed.

4

You can remain seated, stand up on your feet, or move over to a bed or a wheelchair. The armrests fold back out of your way.
